

Application Description

DUST REMOVAL BLOWN FILM PROCESS

Xstream high velocity non contact surface cleaning technology with AUTO^{DC} ionisation system

Application Information
DUST CONTROL

Application Description

Prevent dust and loose fibers on film surface prior to winding!

Film extrusion is the first step to the ready-for-use packaging. It is the foundation for efficient printing and converting and therefore a top quality product must be achieved. With our technology you are ensuring a dust free product to guarantee that your customers receive a high quality product.

Key Features:

- Retrofitable – fast and easy installation in any existing system
- Up to 10.000mm web width
- Up to 2.000m/min web speed
- Fully automated including AUTO^{DC} ionisation
- All parameters and system efficiency visualized

Our product is ideal for many packaging film processes:

- Unwinding-Rewinding
- Laminating
- Coating
- Printing
