

Application Description

STATIC REMOVAL high speed paper production

iONstream 4.0 network capable
AUTO DC Technology® static
neutralising system

Application Information
STATIC CONTROL

Application Description

High speed paper lines with wide width **MUST** have static control!

During the process of paper manufacturing especially after the calander section, static discharging is essential due to tremendous static charge generated. In order to guarantee worker safety and product quality, static neutralisers are essential. Main target for these applications is static levels below 2kV.

Key Features:

- Network capable
- 6, 12 or 18kV EX and non Ex
- ATEX EX approved 24V DC system
- Intelligent AUTO DC Technology® ionisation
- All parameters and system efficiency visualised

Our product is ideal for many paper processes:

- Writing paper
- Printing paper
- Decorative paper
- Specialty paper
